

MAKE A BIRD FEEDER

THE BIG BACK
GARDEN SLEEP

UPCYCLED BOTTLE FEEDER

To make this easy bird feeder you will need an empty, clean bottle, garden string, scissors, two wooden spoons or pencils and of course some bird feed.

Using the scissors make four holes in the sides of the drink bottle, two near the bottom and two half way up and then push the wooden spoons/or pencils through from one side to the other. You will need to make sure the holes are plenty big enough for the seed to be able to get out so give the spoons a good wiggle!

Then fill the bottle with bird seed and tie the string around the neck of the bottle so you can hang it up in your garden.

EGG BOX FEEDER

This egg box feeder is super simple to make. Being made out of cardboard means it won't last forever, but its good to reuse the contents of your recycling bin!

Carefully tear off the lid and closing tab from a cardboard egg box and then use a bit of string knotted at each end to make a loop to hang it up with.

All that's left to do is add the bird seed!

MAKE YOUR FEEDERS IN ADVANCE SO YOU CAN ENJOY WATCHING THE BIRDS FEED ON YOUR BIG BACK GARDEN SLEEP!
